

## Data Collection and Preprocessing Phase

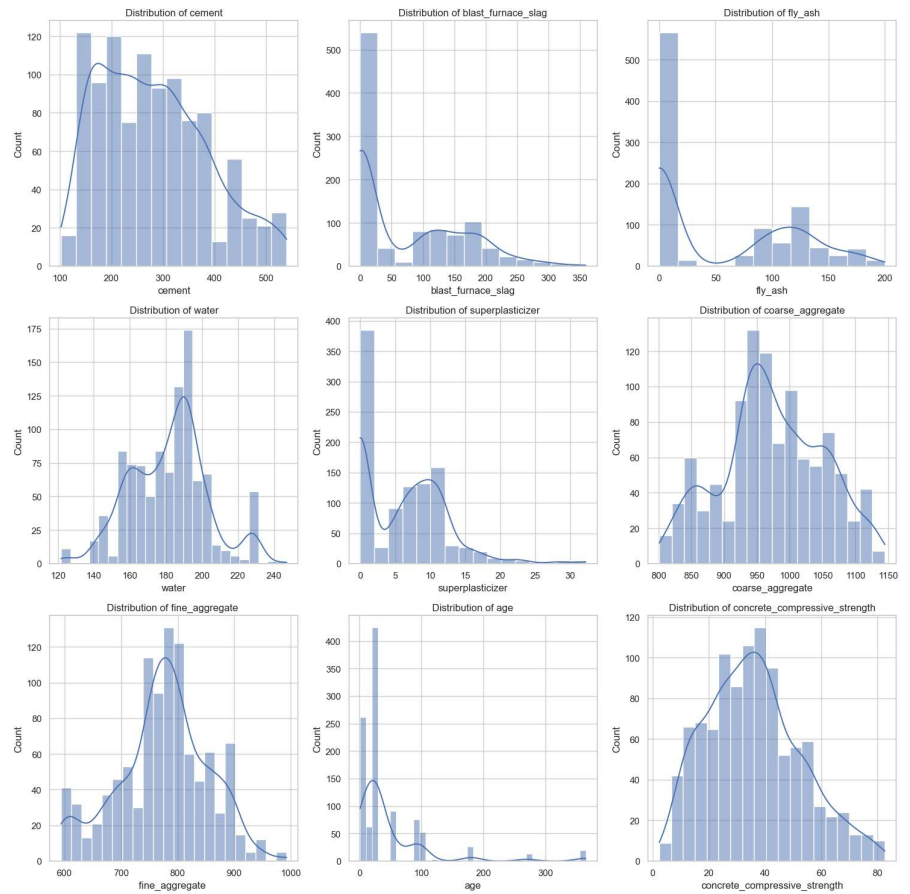

Date	14 July 2024
Team ID	SWTID1720171884
Project Title	Predicting Compressive Strength Of Concrete Using Machine Learning
Maximum Marks	6 Marks

## Data Exploration and Preprocessing Template

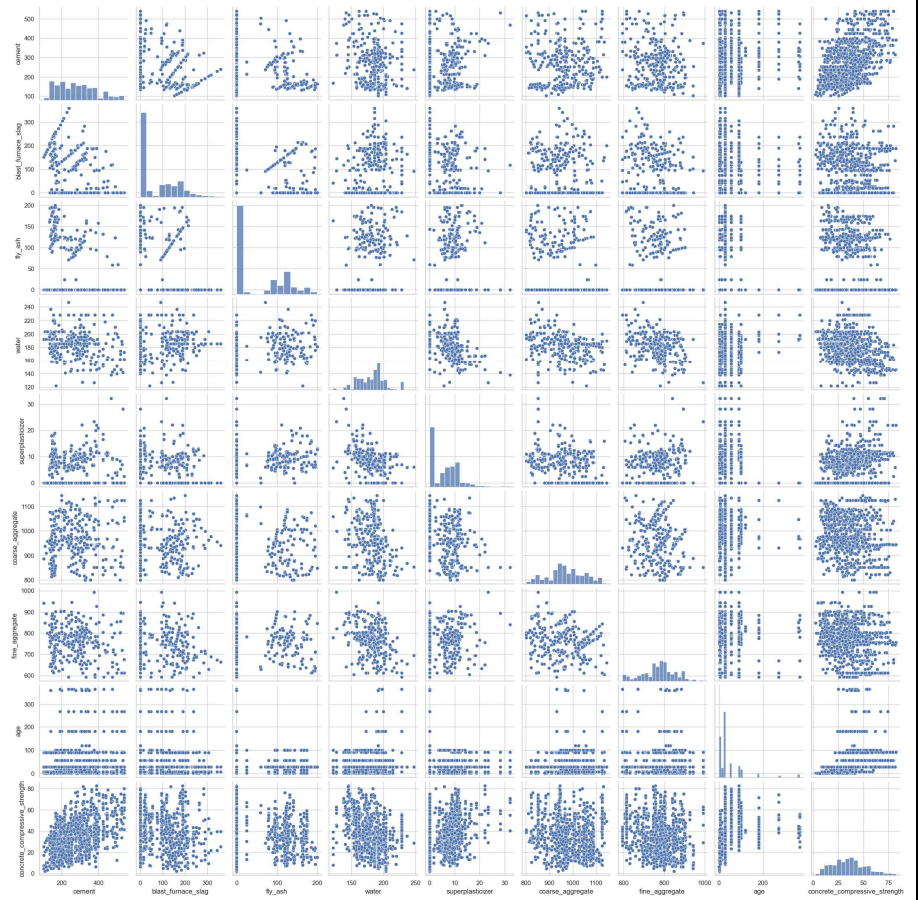

Identifies data sources, assesses quality issues like missing values and duplicates, and implements resolution plans to ensure accurate and reliable analysis.

Loading Data	<pre>data=pd.read_csv('concrete_data.csv')</pre>
Handling Missing Data	<pre>data.isnull().sum()</pre> <pre>[13]:</pre> <pre> cement                                0 blast_furnace_slag                     0 fly_ash                                0 water                                   0 superplasticizer                       0 coarse_aggregate                       0 fine_aggregate                         0 age                                     0 concrete_compressive_strength          0 dtype: int64 </pre> <p>No null values in the data</p>
Data Transformation	No need of transformation as there are no categorical data in the dataset
Feature Engineering	All 8 features are considered as they are the components of concrete mixture.
Save Processed Data	<pre>: data.to_csv('preprocessed_data.csv')</pre>
